声音隐私

是开敞式办公室员工最关心的问题

过去几十年，开敞式办公空间大幅度增加，逐渐取代格子间成为主流办公布局。虽然开敞式环境被认为增加了员工之间的合作关系，降低了房地产成本，但开敞式空间对于个体员工的绩效，并没有积极的提升效应。

牛津经济研究所 (Oxford Economics) 的一项研究得出结论，开敞式办公室的噪音污染不可忽视，63% 的员工表示自己缺乏安静的工作空间，这反过来又对“他们的工作效率、满意度和幸福感产生了负面影响”。

Over the past few decades, open plan office spaces have increased significantly, gradually replacing cubicles as the mainstream office layout. Although open plan environments are believed to increase collaboration between employees and reduce real estate costs, open plan spaces do not have a positive effect on individual employee performance.

A study by Oxford Economics concluded that noise pollution in open plan offices is not negligible, with 63% of employees saying they lack quiet workspaces, which in turn has a negative impact on "their productivity, satisfaction and happiness."
